Objective

I am a self-taught front-end developer passionate about creating engaging and user-friendly web experiences seeking an opportunity to apply my skills and expand my knowledge starting May 2023. My passion, adaptability, and ability to deliver exceptional user experiences make me an excellent candidate for your team. I am excited to contribute to your company's success and embark on this new chapter in my career.

Projects

Hackathon Site

Summary: The goal of this project was to independently create a fully responsive, visually appealing mock hackathon site built using React, Firebase, and CSS.

Features:

- User profiles with account creation, sign-in, and sign-out capabilities.
- Real-time discussions with the dynamic comment section, where your thoughts instantly appear for all users.
- An easy and seamless shopping experience with a built-in store feature, allowing you to browse and add trendy clothes and premium items to your cart.

Weekly Weather Forecast App

Summary: The goal of this project was to independently create a fully responsive, visually appealing weather app supporting multiple modes of search using React, TypeScript, and CSS.

Features:

- A Seamless user interface that provides accurate and up-to-date information on today's weather and a week-long forecast
- Search by city and country code, latitude and longitude coordinates, or your current location.
- A dynamically updating clock that gives you the exact time of any location searched.

Task List App

Summary: This project aimed to independently create a fully responsive, simple, and functional task list manager using React and CSS.

Features:

- Effortlessly add, delete, and edit tasks to stay organized and focused.
- Task filtering options allow you to view incomplete or complete tasks and a comprehensive overview.

- Ensures that your tasks are always saved, thanks to its local storage feature; even when you leave the app, your tasks will still be there.

Relevant Coursework

FreeCodeCamp Certifications:

- JavaScript Algorithms and Data Structures(300hrs)
- Responsive Web Design(300hrs)
- Front End Development Libraries(300hrs)

Community Service and Activities

Our Neighbors Farm & Pantry | Thatcher, AZ

Role: Volunteer

- Actively contributed to a local food pantry, assisting in the efficient and organized unloading of incoming food trucks.
- Demonstrated strong organizational skills by sorting and storing food items, ensuring easy accessibility and inventory management.
- Provided valuable support by loading food into vehicles and ensuring prompt and convenient distribution to individuals in need, including the elderly and disabled.
- Dedicated several hours of service to the community, exemplifying a strong work ethic and commitment to making a positive impact.
