

EDWARD IBEH-YOUNG

Front-End Developer

SUMMARY

I am a structured, efficient, and detail-oriented developer with a creative streak. I am passionate about my work and enjoy the opportunity it offers for continuous learning and improvement.

Experience

My current experience lies in my personal work, details of which are listed below, and live demos along with source code are hosted on my portfolio: <https://etiyx.com/>

Hackathon site:

Features:

- Responsive design
- Store / Cart functionality
- Dynamic rendering of HTML
- Manipulation of DOM based on user events
- Use of Realtime database through fetch API
- Realtime blog / Comment section
- Use of Firebase Auth to create and manage user accounts

Weekly weather app:

Features:

- Responsive design
- Dynamic rendering of HTML
- Manipulation of DOM based on user events
- Consumption of multiple REST API endpoints to asynchronously retrieve data for the user.

React Todo-app:

Features:

- Responsive design
- Utilization of local storage
- Manipulation of DOM based on user events.
- Utilization of multiple React hooks and core React concepts.
